Mr. Bose Thompson returned to Charlotte last week, accompanied by his little niece, Miss Bert Cochran, who has been on an extended visit to her aunt, Miss Gertrude Thompson.

We have heard various estimates made of the cotton crop, ranging from a half to three-quarters of a crop. Neighbor Toby Howell says his will not give him the trouble to build a cotton house, as he can put all he makes under the bed.

Mr. Bob Caldwell will run the gin at Walter again this season, and is making preparations to begin operations. In a few more days the busy hum of machinery will be heard, and cotton harvesting will be in full blast. The length and breadth of the farmer's face will then indicate the price realized for a crop shortened by unfavorable seasons, which once promised to be the biggest crop in the history of cotton farming.

The pleasures of Oak Glen were very much enhanced last Friday by the presence of Prof. Logan D. Howell, of New York, (and don't know his rank) Geo. P. Howell, U. S. N., of Charleston, S. C. Their presence here awakened many pleasant recollections of the long ago, which are inscribed on memory's tablet in characters of brightest line; and as the years pass by, the memories of those days grow dearer as they bring back "faces we shall see no more."

Our Usually quiet community is somewhat alarmed over several cases, reported to be small pox in the vicinity of Rush's chapel, a colored church, it being confined to the colored population, and no means having been employed till last week to prevent its spreading. Several of our citizens went to your city Monday to see if active measures could be taken to stamp it out. There were three cases at one house in twenty feet of the county road, that for several days aired themselves in the front yard.

Goldsboro Business College

Opens Sept. 13th.

ED. ARGUS:—

Many of your readers will doubtless be glad to know that we have decided to establish one of our Business Colleges in your city, and thus bring a thorough business education to the door of the many young people of that region, at half the cost of going to distant schools.

We now have six Business Colleges running, and need to double the number, as the demand upon our "Employment Bureau," for thoroughly trained book-keepers, stenographers, typewriters, etc., is greater than we can supply, as business men have learned that our system of personal instruction enables us to turn out a class of graduates, who are thoroughly and carefully trained, many of whom are now earning from \$50 to \$75 per month, who were not able to earn half that when they came to us. What we have done for others, we will be glad to do for the young people of your region.

We use the "E-System" text-books, and most modern methods of instructions, and only want diligent, ambitious students, anxious to qualify themselves for good remunerative positions, and anxious to make something out of themselves in life. Lazy indolent students not wanted at any price.

We want 50 bright students ready to enter at the opening, and can assure all graduates that they will be greatly pleased with the superior advantage offered them. We guarantee all graduates, positions, and a free life membership in our Employment Bureau. Full particulars to all addressing us at Greensboro.

Yours for Business Education,

J. H. LIPPARD.

Acid Sour Tired Painful Starved Craving Enlarged and Nervous Stomachs Are All Caused by Indigestion

This exposes the nerves of the stomach, and causes the glands to secrete a poisonous solution instead of the natural juices of digestion. All of the supplies of the body are absorbed into the blood through the glands along the digestive tract. We do not require to be told how important it is that these glands should be kept pure and clean and sweet and healthy. We do not need to be told that if this is not done, the blood becomes so impoverished that it not only fails to supply the various organs of the body with the nourishment necessary to keep them strong and healthy, nor that it deposits the poison it receives from decaying food in the various organs, and instead of their receiving strength from the blood, they receive disease.

The nervous system is usually the first to show the evil influences of such a condition. It causes unsound sleep, and rest that is not refreshing. We get up in the morning feeling tired, languid and our temper is uncertain. We lose that natural cheerfulness so much appreciated by our friends when we meet them. We have a headache or aches in other parts of the body.
